

I find great value in the satellite radio service in my car for which I gladly pay a monthly fee. Satellite radio provides me with an excellent variety of programing that maintains consistent quality of reception across the entire country. The recent addition of local traffic and weather reports for our greater Los Angeles area is quite welcome and has already saved me time and gasoline by helping to avoid traffic congestion on the freeways. Please reject petition 04-160 from the NAB that would end this valuable new service.
